Anecdote of Professor Benry.

but once at Mentrest "I noticed that this fine looking man, when he arrived at the hotel in Montreal was placed at the head of our table, but did not know who he was He come by the same route and at the same time with us, and was very kind und courteous to my trav ching companions as well as myself What I remember more distinctly than anything olso was a 'bappening' at Rouse's Point while we were waiting for the steamer. The professor was talkative and communicative in his quiet way, and was full of incidents of travel and adventure. Soon the steamer ap peared in sight, and while the was ap proaching us the professor sat upon the what looking dreamily at her Present ly be aroused himself, and said 'f see a peculiar sparkle of the waves near the side of the steamer where the sun shines upon her' (it was almost sunset) 'I wonder what the cause of it is? I have seen phosphorescent light before but never exactly like this. And see! there it is upon the other, the darker inde of the steamer Well certainly that is very curious. We booked, and indeed it seemed is markable. First upon the bright side of thostermi'r, and then upon the dark side would appear these curr one if whee of light and disappear almost instantly They seemed to come at egular intervals, and it was beautiful as well as straige. Our reveries were radely disturbed, however, by one of the enstons inspectors approachme

. Looking at them flashes? "'Ves' said the pintessor. I wonder անունիլչ առա^{ջը լ}

A Curlons Custom.

lapsed into silence. Editor's Drover in Horper's Magazin for Lugust

It was the custom in Daleylon, 5000 years before the Christian era, to have an annual auction of the immerised ladies In every year, on a curtum stated day each district assembled all ita virgins of marriageable age. The most be entitled were put up heat, and the man who pard the highest gained possession of her. The second in per sonal charms followed her, and so on, this the bidders might gratify them selves with handsome wives according to the length of their purses. There may jet remain in Bubylon some for whom no money was offered, but the provident Bobylonian managed that When al councily ones are sold, the criers order the most deformed one to stand up and after demanding who will mary her for a small sum she is adjudged to him who is satisfied with the least and in this manner the money raised from the sale of the handsome serves as a portion for those who are either of disagreeable looks, or that have say other imperfee

THE young men of this country will be pleased to know that an Olno barber has invented a machine by which he can ainge off the human hinr one thirteen one hundredths of an inch closer to the skull than it is now possible to bring it with the clipping machine. your issue of the 15th inst, under the On Friday, 19th inst, quite a number of caption of 'An Economical Suggestion soldiers and eltisens met at the court to our City Council " and over the signaoom at 8 p m, to hear the report of the ture of "Taxpayer," an article on the ommittee appointed one week ago Cupt subject of gravel sidewalks, evidently W J Larey in the chair and Lieut J M written in the spirit of ridicule, and with little reference to facts I hoped when I G F Kimball and J M Clokey were Capt George B Durfee, from the com commenced reading the article to find mittee, reported that the committee had some valuable suggestion on the subject decided to hold a Re-Union of the Bol of sidewalks, a subject that has occupied diers and Sallors who served in the Union n my, now residing in Macon and adjoin 20 years, both as a citizen and a member ing counties, upon the 17th day of October

of the city council Of the different materials that have come under my observation, suitable for sidewalks, my preferences are in the or der following First, stone flagging, sec ond, an imported paying tile, largely used in the city of Clalveston, and per bans other seaport, and possibly in some inland cities 3d, paying brick - and good hard hurned common building brick are as good as any when properly laid, 4th, mag tran and ret harbor

In this city, as years increased, upil a was adopted, and the secretary ordered to few blocks of plank sidewalks had grown to many miles, the monthly pay roll for lumber and labor to build new and repair old walks was a frequent and ever recur ring reminder to members of the city council that adewalks made of such periobable material were an expensive that good plank walks, kept in good re pair, would, sooner or later bankrupt any city spread over as much territory as the city of Decatur. The one thing the av rage taxpayer is constantly ringing in a n nothing has the council been more sucin substituting gravel for lumber in the construction of sidewalks. But to acgravel, the city council have agreed low crizers as front of whose property their walks may have the same converted into beck walks by simply furnishing the brick upon the ground, without further possible foundation for a brack wide, as will us the chemist, and is no small work accomplished in the right duration, whether the brock be full now or in the remate future. In my ladement box (ve) the longer a gracel walk is used the less will be the desire to have it covered with bruk It is tim that a new grasel wilk seen a pa go diam of tonantificational plank or brack walk, and prople may avoid a new gravel wilk as they do new made touls. But if I expayer has ever rug in the black mad alongside of even a new made gravel walk the has seen more than I have The wetter a gravel wilk, especially a new one the better and greed walks is they are being constinct ed by the city are not perceptibly affected by the freezing and thawing of winter and spring and brok lad upon such willowkeep their place perfectly. I finy i ten had my own door to the past three or four years over some 200 feet of gravel walk and I expayer to the contrary not withstanding, i im prepared both by ex peticuce and observation, to say thut

tunnal dread of losing their skirts or has ing them caught on pail beads to suggest in the way of sidewalk building I shall be glad of an opportunity to sid in ity harmless to the youngest child, and the best towns on the Walnus Harlens STASTHORES WHITMORE Mr William coupling them with any valuable or sensi-

PROBIBITION CONVENTION.

The delegates from the several town ships in the county appointed to attend the Probibition Convention called to meet to day, assembled in the court house at Ho'clock Rev W & Crissey called the meeling to order

On motion, Capt J & Post was made temporary chairman of the convention, Lhosen secretaries On motion, the following gentlemen

were appointed a committee on creden a considerable of my attention for the past | tints P W Taylor, of Decamer, Wm Hight, of Macon, and Wm F Martin, of Elwin

 It was then voted to adjourn to I o'd lock in the afternoon

On the reassembling of the convention the committee on credentials reported

which report was adopted A Parice of Mt Zion, offered the follog ing resolution

Recoired. That this convention endorse the platform and candidates of the Probi Pending this resolution the following

resolutions of instructions to the delegates of the Blue Mound Albance were read for information, which elicited considera ble discussion Resolved, That the policy of making a political party out of the temperance or ganization of the county will be unwise in that it will divide current workers for

temperance and will be used as a hobby to advance the finiers ats of political dem agogues
Resolved. That the most efficient policy is to unite in the demanding of all political parties that they nominate for the respective offices candidates whose principles are known to be in the interest of the

cause of temperature The resolution of the gentleman from Mt Zion was adopted

It was then voted to take an informal ballot for sheriff, which resulted as follows F L Wood, 51 John Barnett, 15 B S Tyler 29, W E Bingham, 11 A formal ballot was then taken, Capt

Bughen withdrawing his name which resulted as follows F L Wood 60 1 T Barmett 7 B 5 Tyles, 41 Dr. S. Cooper was then nominated for

GRAVEL WALKS.

EUTORS REPUBLICAN -1 noticed in caption of 'An Economical Suggestion to our City Council " and over the signature of "Taxpayer," an article on the subject of gravel sidewalks, evidently written in the spirit of ridicule, and with little reference to facts. I hoped when I commenced reading the article to fluid some valuable suggestion on the subject of sidewalks, a subject that has occupied a considerable of my attention for the past 20 years, both as a citizen and a member of the city council

Of the different materials that have come under my observation, suitable for sidewalks, my preferences are in the or der following First, stone flagging, see ond, an imported paving tile, largely used in the city of Galveston, and perhaps other seaport, and possibly in some inland cities 3ld, paving brick -and good hard hurned common building brick are as good as any when properly laid, 4th, gravel, 5th, and as a last resort, plankas plank walk is but another name for man trap and rat harbor

few blocks of plank sidewalks bad grown to many miles, the monthly pay roll for lumber and labor to build new and repair old walks was a frequent and ever recur ring reminder to members of the city council that sidewalks made of such pullshable material were an expensive uxury, and forced them to the conclusion that good plank walks, kept in good repair, would, sooner or later bankrupt any city spread over as much territory as the rty of Decatur. The one thing the av crage hypayer is constantly ringing in a councilmens cars as retrenchment, and in nothing has the council been more succosful in the way of retrenchment than in substituting gravel for lumber in the construction of sidewalks. But to accommodate those who prefer brick to gravel, the city council have agreed by resulution unanimously adopted that all citizens in front of whose property their is now or may hereafter be laid gravel walks may have the same converted into brick walks by simply furnishing the brick upon the ground, without further cost to them, and a gravel walk is the best possible foundation for a loack walk, as well as the chespest, and is no small work accomplished in the right direction, whether the back be full now or in the remote future. In my judgment, however the longer a gravel walk is used the less will be the disne to have it covered with brick. It is true that a new gravel walk is not as pleasant to walk on as a second plank or brack walk, and prople may avoid a new gravel wilk as they do new made touls. But if Juxpayer has ever seen anybody but a lunate or fool wilk ing in the black mud alongside of a ven a new made gravel walk the has seen more than I have The wetter a gravel wilk, mayel walks bethey are being constituet cit by the city are not perceptibly after ted by the freezing and thawing of winter and spring and brock had upon such wilks keep their place perfectly. Thuse to whed my own door tor the past three walk and I expayer to the contrary not withstanding, I im prepared both by expersons and observation, to say that gravel walks are a log thing for the average taxpayer of the city of Decisius their original cost as compared to lumher being as I to at the cost of keeping falls, bruised and broken limbs as one to ten milhons. They are clean or cleaner

ing them caught on nail beads If I aspnyer has anything new or old I shall be glad of an opportunity to sid in in thing his suggestions available for the ject is simply to ridicale the citizens who happen to composi the council, without coupling them with any valuable or some bli suggestion then I hope Messi. I h

manentily cured by SANFOAD'S RADIGAL EUNE.

To understand the philosophy of this be intiful and often subline phenomenon, so often witnessed, and so very essential to the existence of plants and animals to the existence of plants and animals. To understand the philosophy of this and a long trun of experiments, must be inmembered 1. Were the atmosphere, here, there everywhere, and at all times, of a uniform temperature, we should never have rain, hail or snow. The water absorbed by it in eva poration from the sea and the earth a surface. would descend in an imperceptible vapor or cease to be absorbed by the air when it was once fully saturated 2 The ab sorbing power of the atmosphere and consequently its capacity to retain he mulity is proportionately greater in wirm than in cold air. The air near the surface of the earth is warmer than it is in the region of the clouds. The higher we ascend from the carth, the colder do we find the atmosphere Hence the perpetual anow on very high mountains in the hottest chinate. Now when from continued evaporation the air is highly saturated with vapor, though it be invisible and the sky cloud less, if its temperature is suddenly reduced by cold currents descending from above, or rushing from a higher to a lower latitude its capacity to retain moisture is diminished clouds are formed, and rain is the result. It can denses, it cools, and, like a sponge filled with water and compressed, pours out the wither which its dimainshed enperts, when the services its relation of the modern to the without which its dimainshed enperts, when the services its relation of the modern to the weeker and confirmed and the services. He reduces the services it is a possible and yet how smaller is the middle order of the weather that the population of the modern that the services are related to the substance of the modern that the services is read as an a force of the substance of the modern that the services is read to the substance of the modern that the services is the substance of the modern that the services is the services of the how simple is the philosophy of can-

The Philosophy of Rain.

and a long trun of experiments, must be timembered 1. Were the atmos phere, here, there everywhere, and at all times, of a uniform temperature, we should never have rain, had or snow The water absorbed by it in eva poration. from the sea and the earth o surface would descend in an imperceptible vapor or cease to be absorbed by the air when it was once fully saturated 2. The absorbing power of the atmosphere and consequently its capacity to retain latmulity is proportionately greater in werm than in cold air. The air near the surface of the earth is warmer than it is in the region of the clouds. The higher we ascend from the earth, the colder do we find the atmosphere Hence the perpetual snow on very high mountains in the hottest chinate when from continued evaporation the air is highly saturated with vapor, though it be invisible and the sky cloud less, if its temperature is suddenly re duced by cold currents descending from above, or rushing from a higher to a of licentum described in a larger than the denses, it cools, and, like a sponge filled with water and compressed, pours out the water which its drammshed capacity can not hold. How singular and yet how simple is the philosophy of the subscribed part of the subscribed in the philosophy of the subscribed part of the philosophy of the subscribed part of the part part

AN ASTONISHING FACT.

A but a proportion of the American people are to day suffering from the effects of Dyspep is not desordered liver. The result of these diseases upon the masse of antiligent and viduable people a mast daming making life netually a burden instead of a pleasure systeme at kepinesing take the individe of Dringwist in Cy on Triends and try one bottle of Grien's August Plower, your specify in hit's a rhan. Millions of bottles of thi medicine have been given away to try its victors with satisfactory results in every Drawists on the Western Continent
